Introduction to manufacturing automation and CIM (Computer Integrated Manufacturing)

- *Automation:*
  - *Set of all measures aiming at replacing human work through machines (e.g. automation is applied science)*
  - *The technology used for this purpose (e.g. this company has an automation department)*
- *Automation:*
  - *Replacement of human work through machines (e.g. the automatisation of the textile factory caused uproar of the workers)*
  - *Replacement of conscious activity by reflexes (e.g. drill of the sailors allows the automatisation of ship handling)*
- *Automation:*
  - *The use of computers and machines instead of people to do a job*
